

party, and in a couple of cars which Monte had dispatched to the scene of the accident conveyed them back to Charlotte, where the doctor, assisted by Dr. Moyer, put the editor's shoulder back in place and dressed a few other minor wounds on his anatomy and dressed Mrs. Curtis' foot which had been badly bruised by the auto landing on it. Miraculously, none of the other members of the party was hurt at all with the exception of a slight scratch upon Mrs. Barber's chin.

The car was but slightly damaged by its overturning and when a new wheel is procured and a few dents are taken out of the fenders and side lamps it will be in as good condition as ever.

The accident is one of those unexplainable ones which happen to everyone during a lifetime, and the only explanation we can make is that as it was the 23rd of the month it was "skidoo time" for us as the car had been under perfect control and was running at less than twenty miles per hour at the time of the accident. However, everyone is out of it in good shape and in a few days will be as good as ever.
