J. H. McCotter is a useful citizen. He is supervising the taking out of four trees around the Congregational church property and the trimming of the many others that adorn the two streets. He knows trees as we shall shortly explain. Mr. McCotter planted the elms on the Grand River avenue side of the Northwestern High school, Detroit, back in the days when Grand Boulevard cut directly through the seventy-five acre D. M. Ferry & Co. seed farm at this point. This gives some idea of the sensational growth of Michigan's metropolis since then. He was given this assignment by Mr. Ferry, Mr. McCotter at that time being superintendent of another Ferry seed farm at Pontiac. He has never lost his appreciation of the dignity and beauty of trees and this fine old school gentleman is finding real compensation in the personal pleasure and satisfaction he is getting out of this complimentary employment.
